

Lewisham Multi Solutions (LMS) is redefining the educational landscape in Africa and beyond with the First Advanced African Learning Academic Ecosystem (FAALAE), powered by Best-spoke African Academic AI-Land (BAA AI-L). By integrating humanoid robots (Optimus, Ameca, Sophia), artificial emotional intelligence, AR/VR, and neural networks, we offer a scalable, adaptive, and revolutionary EdTech platform. The platform delivers customized learning in Business, Technology, Healthcare (non-surgical), and Legal domains (immigration, asylum, discrimination, fraud). We aim to partner with accredited institutions and professional bodies, allowing them to set their tuition, host high-quality accredited programs, and gain access to a broad learner base across Africa and globally.
