PRODUCT OWNER | AI-DRIVEN SaaS | FINTECH | ENTERPRISE SYSTEMS

Product Owner with 10+ years of experience leading end-to-end product development and delivering scalable SaaS platforms across fintech, education, energy, and enterprise systems. Strong expertise in Agile/Scrum, API integrations, cloud platforms (AWS & Azure), and AI-driven product solutions.

Proven track record of delivering products that drive revenue growth, operational efficiency, and digital transformation, including solutions that increased revenue from ₦110M to ₦305M and ₦27B to ₦267B.

CORE COMPETENCIES

Product Strategy & Roadmapping
Agile / Scrum Product Ownership
SaaS & Platform Development
AI & Data-Driven Product Design
API Integrations (QuickBooks, Zoho, etc.)
Cloud Platforms (AWS, Azure)
Stakeholder Management
Product Analytics & KPI Tracking
Go-To-Market Strategy (GTM)
Workflow & Process Automation

PROFESSIONAL EXPERIENCE

Lewisham Multi Solutions Limited

Product Owner / Product Lead
May 2012 – Present | Remote

Lead Product Owner – DOKWA Suite (Finance Copilot & Workflow Platform)

2025 – Present

- Leading development of DOKWA, an AI-powered finance and workflow automation platform currently at Minimum Marketable Features (MMF) stage.
- Defined product vision to unify financial systems (QuickBooks, Zoho, Sage) into a single intelligent dashboard.
- Designed Finance Copilot for cashflow insights, reconciliation, and predictive decision-making.
- Built workflow automation engine for approvals, vendor validation, and operational controls.

- Developed MVP to MMF roadmap, prioritizing high-impact features for early market adoption.
 - Integrated secure APIs for real-time financial data synchronization.
 - Positioned product for global compliance and enterprise scalability.
 - Driving go-to-market strategy targeting SMEs and finance teams.
-

Product Owner – SUMAS (University Management Platform)

Digital Concept Ltd | 2023 – 2025

- Owned delivery of a full-scale university ERP system (admissions, e-learning, payments, exams, reporting).
 - Managed product backlog, user stories, and stakeholder requirements.
 - Led Agile/Scrum ceremonies and cross-functional teams.
 - Achieved revenue growth from ₦110M to ₦305M within one quarter.
 - Eliminated manual processes through full digital transformation.
-

Product Owner – Car Rental & Hospitality Platform

Gornium LLC, Texas | 2023 - 2023

- Led development of a hotel-integrated car rental platform.
 - Defined product roadmap and monetization strategy.
 - Delivered system projected to increase revenue from ₦35M to ₦80M.
 - Focused on fraud reduction, booking optimization, and operational efficiency.
-

Product Owner – QA & Release Management (Multi-Product SaaS)

2019 – 2022

- Owned product quality strategy, release planning, and acceptance criteria.
 - Implemented Test-Driven Development (TDD) practices in Agile environments.
 - Led QA teams across multiple web and mobile applications.
 - Ensured alignment between product requirements and delivered features.
-

Product Owner – Business Process Automation Platform

Sevico Manufacturing Ltd | 2018 – 2019

- Led development of enterprise automation system replacing manual processes.
- Delivered measurable outcomes:
 - Profit growth from ₦71M to ₦169.5M
 - Cost reduction from ₦13M to ₦5M monthly
 - Recovery of ₦155M trapped funds
- Built product roadmap focused on operational efficiency and financial transparency.

Product Owner – Pipeline Surveillance & Security System

2012 – 2018

- Led development of petroleum pipeline monitoring system for theft detection.
- Improved operational efficiency and reduced product leakages.
- Increased revenue from ₦27.3B to ₦267.4B.
- Coordinated cross-functional teams and stakeholders.
